

INSTRUCTIONS FOR FILING
A NOTICE OF INTENT
IN GARDNER, MA

These forms are used to describe the proposed activity to allow the Gardner Conservation Commission and the Massachusetts Department of Environmental Protection (DEP) to evaluate potential impacts to wetlands and adjacent resource areas.

Wetlands are protected because they provide important functions for the public including protection of public and private water supplies, protection of groundwater, flood control, erosion and sedimentation control, storm damage prevention, water pollution prevention, protection of fisheries, wildlife and wildlife habitat, aesthetics and recreation. For these reasons, the Massachusetts Wetlands Protection Act prohibits the removing, filling, dredging or other alteration of the land surface, water levels or vegetation within wetlands without filing a written Notice of Intent with the Gardner Conservation Commission and obtaining a permit. The Act also gives jurisdiction to the Conservation Commission for activities within the area that extends 100 feet from many of these wetlands (Buffer Zone). Under the Gardner Wetlands Protection Ordinance, the Conservation Commission has jurisdiction over alterations within 30 feet of a wetland (No Disturbance Zone) and within 30 feet of any No Disturbance Zone (No Build Zone). For more information, visit the Gardner Conservation Commission website at: www.gardner-ma.gov/234/Conservation-Commission
